Apps: TechTool Pro, MacGizmo, iSale

→ TechTool Pro 4.5.3 (\$100) maintenance tool that helps recover, repair, and optimize your Mac.

Includes options to check critical computer hardware, repair hard drive problems and monitor computers in the background for impending problems. The new release has updated Volume Structures and Optimization routines, updated Volume Journaling feature for Intel-based Macs, integration of the TechTool Pro 4 Security Patch, added compatibility for new Macintosh models up through June, 2007 and other minor changes and feature enhancements. [Download - 25.6MB]

→ MacGizmo 1.0.8 (\$45) allows you to see the content and other useful information of any selected items in the Finder and of other participating software programs. Currently fully supports most of the common kinds of items that populate a disk, like: images, sounds, music, video, text, pdfs, web files, fonts, folders, applications and many more. The new release adds a button in the main window that allows the application to be put to sleep and fixes a bug that caused crashes when certain types of files were selected. [Download - 2.7MB]

→ MacFamilyTree 4.5.0 (\$50) genealogy application. This release adds a new report "Birthdays", showing all persons with birthdays within the next 12 months and optional display limited to
