➔ **Equinix Improves Cisco Support in VPN Tracker 6.2**

March 2nd, 2010 at 5:02 PM - Product News by Bryan Chaffin

Equinix announced Tuesday the release of **VPN Tracker 6.2**, an update to the Mac OS X VPN client that improves support for Cisco's line of networking products, and adds new support for the Cisco ASA 5500 series.

VPN, or Virtual Private Network, clients allow users to access desktops on remote computers - VPN Tracker is aimed at Mac users in a corporate environment that need to access their Windows machines and networks from their home Macs.

Version 6.2 is free for registered owners of version 6.x. The full version is priced at €79 (US\$107.56). You can find [more information](#) at the Equinix [Web site](#).
