### **VPN Tracker 6.2 for Mac adds Cisco ASA 5500 series support**

Monday, March 8, 2010

Equinix has released [VPN Tracker 6.2](#), an update to the IPsec based virtual private network client for Mac OS X that supports hundreds of VPN gateways. The new version adds support for the Cisco ASA 5500 series of adaptive security appliances, and will work in a Cisco Dynamic Multipoint VPN (DMVPN) setup. The company said that the new version also improves compatibility and connection speeds with other Cisco devices as well.
