## Apple News | Tizi Go Dongle Turns the iPad Into a Mobile TV

Saturday, 28th January 2012, 05:01 pm

This entry needs translation. To help us and submit a translation please click [here](#)

Tizi Go is a DVB-T TV receiver that connects directly to the iPad dock connector and is small enough to fit into your pocket.

Featuring an integrated flexible antenna and the latest generation, high-sensitivity DVB-T chipset, Tizo Go provides a clear TV picture in MPEG-2 format. Intelligent power management software ensures that users get the most out of the integrated battery built-in to tizi go, which can be recharged with a micro-USB cable (included).

Tizi Go is already being sold in Germany and will soon go on sale internationally via Belkin. The device is powered by the Tizi.tv app which can be downloaded from the App Store [here](#).

The European price for the Tizi Go is €99,99.
