

APC Tracker Universal Binary update released

March 9, 2006 - 10:48 EST Equinux today announced that [APC Tracker 4.3](#), software for connecting to Uninterruptible Power Supplies (UPS) from APC to Mac computers and servers, is now a Universal Binary, allowing users to run it on the new Intel-based Macs. Other new features in this release include: USB support with more detailed values available; better test mail dialog and options; better support for long IP addresses; and a fix where the server application could fail if DNS wasn't available. APC Tracker is priced starting at US\$129.90. [[Email this story](#)]
